| Description | | | |
| <p>There have been previous efforts to improve sub-task management, but they lack support for cross-project sharing setting.</p> <p>Below is a patch which has been tested manually. Some extra test case are desired, but I would be unable to help more unfortunately.</p> <pre>Index: app/models/issue.rb ===== --- app/models/issue.rb (revision 18330) +++ app/models/issue.rb (working copy) @@ -1509,7 +1509,18 @@ # Returns a scope of projects that user can assign the issue to def allowed_target_projects(user=User.current, context=nil) if new_record? && context.is_a?(Project) && !copy? - current_project = context.self_and_descendants + case Setting.cross_project_subtasks + when 'system' + current_project = nil + when 'tree' + current_project = context.root.self_and_descendants + when 'hierarchy' + current_project = context.hierarchy + when 'descendants' + current_project = context.self_and_descendants + else + current_project = nil + end elsif new_record? current_project = nil else</pre> | | | |

History

#1 - 2019-09-22 07:33 - Andrey Galkin

- File *obey-subtask-settings.patch* added

Attaching the patch as file as description got screwed.

#2 - 2019-09-22 07:35 - Go MAEDA

- Description updated

#3 - 2021-04-12 10:13 - Anonymous

- File *obey-subtask-settings-411.patch* added

Here is the adaptation to 4.1.1 of this very useful patch.

It applies the settings of the sub-task to a new issue (« Allow cross-project issue relations »).

#4 - 2021-04-12 10:58 - Anonymous

- File obey-subtask-settings-411.patch added

Here is the adaptation to 4.1.1 of this very useful patch.
It applies the settings of the sub-task to a new issue (« Allow cross-project issue relations »).

#5 - 2021-06-03 15:10 - Go MAEDA

- Related to Feature #12704: Allow selecting subprojects on new issue form added

#6 - 2021-06-03 15:16 - Go MAEDA

I think this issue was fixed in Redmine 4.2 by [#33419](#). Could you test with Redmine 4.2?

#7 - 2021-11-24 23:37 - Anonymous

Yes, I confirm !
