There also seems to be a glitch in the way one/few/other versions are chosen. I just saw '3 minut' on my svn-version Redmine. 'minut' comes from the x\_minutes\_other, but for count 2-4 x\_minutes\_few should be used. Is this selected using the gloc rule from [#1299](#) ? I don't see it in the new source.

Applied in [r2751](#). Thanks.
