The embedded base64-encoded images look like PNG images, not vector icons.

It's known I suppose. On 26th September, I asked Bernhard in #freetalk-en to remove this issue, so I could recompose it correctly again in the future, since you can't edit your own tickets, but he didn't want to remove it.

#3 - 2019-10-09 07:08 - Marius BĂLTEANU

- Tracker changed from Patch to Feature
- Resolution set to Invalid

I'm closing it.
