Target version:				

Description

Redmine has LDAP on the fly user creation feature (see RedmineLDAP). After the on-the-fly creation, admins have to perform some tasks such as checking if the creation is OK and adding the user to groups or projects.

Currently, however, no notification is sent to admins after a user is automatically created, so admins have no chance to notice that the user was created.

I think some notification should be sent to admins when a user is created via LDAP on-the-fly user creation feature.
