

Redmine - Defect #3222

inline html not supported

2009-04-22 20:24 - James Byrne

Status:	Closed	Start date:	2009-04-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		
Description <p>The wiki formatting help for textile states that inline html is permitted. This does not appear to be the case for Redmine's implementation. However, textile itself does not possess a sufficiently rich set of formatters to substitute for html.</p> <p>If the issue is sql injection via a wiki page then I suggest that critical characters be escaped but that basic html still be permitted.</p>
