Description

Activity shows 30 days of project activities by default. But I think it is better to use a smaller value as a default value for the following reasons:

- The cost to render the activity page is expensive. It will take a long time to render 30 days of activities if there are a lot of updates
- Activity page is used to understand recent updates. I think 7 days per page is enough for the purpose. Activities of 20 days or 30 days ago is not always necessary

```bash
diff --git a/config/settings.yml b/config/settings.yml
