Target version:		Affected version:	
Resolution:			
Description			
In RedmineRepositories the Mercurial versions supported are from 1.2 to 4.3.1.			
We upgraded Redmine from 3.4.4 to 4.0.4 (centos 6.9 with Mercurial 1.4) and got this error:			
<pre>hg --config extensions.redminehelper=redminehelper.py rhsummary *** failed to import extension redminehelper from redminehelper.py: 'module' object has no attribute 'command' hg: unknown command 'rhsummary' Mercurial Distributed SCM</pre>			
We upgraded Mercurial from 1.4 to 4.0 and the problem was solved.			
I would update the wiki myself, but I don't know which is the minimum version supported.
