History

#1 - 2019-10-21 06:19 - Go MAEDA

I was not able to reproduce the problem with Redmine 4.0.5.devel.18786.

Could you describe details of how to reproduce the problem? Does "settings page" means /projects/IDENTIFIER/settings/* or /admin ?

libs/js/iframe.js is not part of Redmine core.

#3 - 2019-10-22 03:34 - ChunChang (Nagaharu) Lo

Hello,

this error occurs in the /settings page and the redmine instance doesn't install any 3rd-party plugins.

Hi,

Never mind. Just grabbed revision 18788 and the /setting works again (don't know why. i didn't do anything.)
