Target version:			
Resolution:			
Description On http://www.redmine.org/my/page we can see our Watched issues , but there's no way for me to see a list of Watched topics I often use the Watch feature to mark things that interest me (regardless of whether I want to be notified of updates or not) but without a list of topics I'm currently watching I have no way of checking back on them in the future if there's no replies.

+1, waiting this feature too

#2 - 2013-03-18 17:48 - Dipan Mehta

May be you can just have watchers per category.

#3 - 2018-07-03 12:22 - Go MAEDA

- Subject changed from Watched topics to Watched topics on My page
- Category changed from Forums to My page
