Resolution:	Fixed																		
Description																			
<p>When viewing a commit in the repository for a non-javascript file, clicking the diff link for that file opens the diff in the "view differences" tab on the same page.</p> <p>When viewing a javascript file with a .js extension, clicking the diff link opens the snippet that would normally go in the "view differences" as a new page with no styling.</p> <p>This is happening on our install across projects and consistently for all javascript files. Clicking on the "view differences" table for the javascript files instead of the diff link does display normally. It is easy to work around, by just using the show differences tab instead of the diff link.</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>4.0.5.stable</td></tr><tr><td>Ruby version</td><td>2.6.3-p62 (2019-04-16) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>5.2.3</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr><tr><td>Mailer queue</td><td>ActiveJob::QueueAdapters::AsyncAdapter</td></tr><tr><td>Mailer delivery</td><td>smtp</td></tr></table> <p>SCM:</p> <table><tr><td>Git</td><td>2.17.1</td></tr></table>				Redmine version	4.0.5.stable	Ruby version	2.6.3-p62 (2019-04-16) [x86_64-linux]	Rails version	5.2.3	Environment	production	Database adapter	Mysql2	Mailer queue	ActiveJob::QueueAdapters::AsyncAdapter	Mailer delivery	smtp	Git	2.17.1

We have the same problem with a GIT or SVN backend.

It looks like the page rendering crashes while building a DIFF of a Javascript file (something to do with syntax highlighting?).

All other file types seem ok:

Example :

<https://source.scenari.software/projects/dev-core/repository/git/revisions/300fb80a966ae09c1ac7c8f7a8104a31dde93b72>

The simple view of the Javascript file is ok :

https://source.scenari.software/projects/dev-core/repository/git/revisions/300fb80a966ae09c1ac7c8f7a8104a31dde93b72/entry/Wsp_Modeling/space/gen/modelBuilder/bs/_common/sm/webSiteGenerator/scDynUiMgr.js

But the diff view is not :

https://source.scenari.software/projects/dev-core/repository/git/revisions/300fb80a966ae09c1ac7c8f7a8104a31dde93b72/diff/Wsp_Modeling/spaces/en/modelBuilder/bs/_common/sm/webSiteGenerator/scDynUiMgr.js

Same with our Mercurial SCM.

version 3.4.4.stable --> works fine

version 4.0.4.stable --> no styles and the menu disappears

When displaying the js file, base.html.erb was not used as the layout file.

Specifying an explicit layout file as shown below should solve the problem.

```
diff --git a/app/controllers/repositories_controller.rb b/app/controllers/repositories_controller.rb
