<b>Description</b> If you select and edit multiple issues, the custom fields are arranged vertically. On the other hand, if you select and edit one issue, the custom field is divided into left and right.  single editing: single_edit.png  multiple editing(Before fix): bulk_edit_before_fix.png  Applying this patch will cause the custom field to be split into left and right for multiple edits in Issue.  multiple editing(After fix): bulk_edit_after_fix.png  The attached patch implements this feature.

Patch by Marius BALTEANU.

#### Revision 19691 - 2020-04-11 11:02 - Go MAEDA

Show toolbar for full width custom fields with text formatting enabled on issues bulk edit page (#32471).

Patch by Marius BALTEANU.

### History

#### #1 - 2019-11-14 15:51 - Go MAEDA

- Category set to Issues

- Target version set to Candidate for next major release

The patch changes the logic for rendering custom fields in bulk edit page to be the same as in app/views/issues/\_form\_custom\_fields.html.erb.

I think it improves consistency.

#### #2 - 2019-11-15 07:52 - Shingo Hosotani

It is just as you say.

Modify app/views/issues/bulk\_edit.html.erb and app/views/issues/\_form\_custom\_fields.html.erb to reduce duplication.

- File bulk-edit-layout@2x.png added

I think full-width custom fields need to be considered in the bulk edit page.

**Editing a single issue:**

**Bulk edit:**

I've attached 3 patches that fix the problem reported here and also, adds the JS toolbar in this page for full width custom fields with text formatting enabled. Should some fixes made here backported to minor versions?
