| Description | | | |
| Hello. | | | |
| I was trying to reply here, but I am receiving "internal error": http://www.redmine.org/boards/1/topics/36216 | | | |
| I am very interested in that plugin. I created a WordPress site using https://themesgenerator.com/ and I would like to integrate it with Redmine. | | | |
| Do you know if there is any paid or free plugin? | | | |
| Thank you very much for your help! | | | |
