Description

Issue 21026 suggests that group can be selected in the user custom field.
I think this is a necessary feature.

#21026 Select user-groups in custom fields of type "User"

If you simply add group editing and display functions on the issue screen, it will not be displayed in the issue list or issue filter.
Therefore, in addition to #21026, the following functions are proposed to be added.

1.Also displayed on the issue list when a group is selected.
2.Both user and group can be selected by issue filter.

The following is Japanese

ユーザーカスタムフィールドでグループを選択した場合、issue

Issue 21026で、ユーザーカスタムフィールドでグループを選択できるようにすることが提案されています。
これは必要な機能だと思います。

#21026 で issue issue list, issue filter

#21026

1.issue list でグループを選択した場合も表示する。
2.issue filter
