

## Calendar is unreadable

The calendar view is unreadable (please see attached screenshot).

This is due to [r2568](#) which adds the issue CSS class to the calendar entry.

So either Issue#css\_classes shouldn't use the issue CSS class or application.css should define other styles for issue when inside table.cal.

"trunk" is probably also affected but I didn't test that.

Do you have some theme installed or something?  
Because with no css modification, here is what I get:

<div> <div>▼</div> <div>2009</div> <div>▼</div> </div> <div>Clear</div>				
Sunday	Monday	Tuesday	Wednesday	Thursday
26	27	28	29

- Status changed from New to Resolved

| set

```
div.tooltip { display:inline; }
```

in a plugin's stylesheet asset because the plugin shows a tooltip with user custom fields on a "link to user" and this link has to be inline.

I will try to find another solution to the problem.
