Target version:	
Resolution:	
Description	
<p>If i want to filter issues with filter of a multiple value allowed field, named "OS", it contains some of predefined values such as OS1, OS2, OS3...</p> <p>If i want to filter issues has value OS1 AND OS2, with the feature, I can:</p> <p>first add Filter "OS", operator "IS", value "OS1". then add Filter "OS" again, operator "IS", value "OS2". And apply.</p> <p>This will be useful for lots of usage. Such as IS OS1 and IS NOT OS2 Contains string1 and not contains string2 ...</p> <p>it's very useful.</p>

I think it can be addressed with the following patch.
I consider it a necessary function.

<http://www.redmine.org/issues/4939#note-56>
