Category:	Search engine		**Estimated time:**	0.00 hour
Target version:	0.9.0			
Resolution:	Fixed			

Description

This is a very minor idea. When you use the search by default all the check boxes are ticked and it searches everything it can.
Maybe there can be an option to search **only** inside the module you're currently viewing.
So if you search while in the forums module it only searches 'Messages' and if you search while in the wiki it only searches for 'Wiki pages' and so forth.

Associated revisions

Revision 2943 - 2009-10-21 19:07 - Jean-Philippe Lang

Contextual quick search (#3263).
Eg. when viewing issues, the quick search will search issues only.

History

#1 - 2009-10-21 19:07 - Jean-Philippe Lang

- Status changed from New to Closed

- Target version set to 0.9.0

- Resolution set to Fixed

Contextual quick search committed in r2943.
