Fix random test failure due to missing call to `set_tmp_attachments_directory` in `WikiControllerTest`.

For `WikiControllerTest#test_update_with_deleted_attachment_ids` and `WikiControllerTest#test_update_with_deleted_attachment_ids_and_failure_should_preserve_selected_attachments`, the files under `test/fixtures/files/` may be deleted depending on the test execution order. Need to call `set_tmp_attachments_directory` as follows.

```ruby
