Description	
<p>In IRC I suggested that Redmine take a page out Trac's book and support the following syntaxes for auto-generating links in commit messages, in comments to issues, and wiki pages:</p> <ul style="list-style-type: none">- [commitID]- [commitID-anotherCommitID]- [commitID,anotherCommitID,yetAnotherCommitID] <p>And allow the resultant page to handle it based on how the underlying repo handles it (afaik, most of them support those syntaxes).</p> <p>I was told it was a good idea and to create a ticket.</p>
