Redmine - Defect #3268

browsing subversion repo fails under apache, but works under WEBrick

2009-04-30 01:18 - Roy Marples

Status:	Closed		**Start date:**	2009-04-30
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:	0.8.5			
Resolution:	Fixed		**Affected version:**	0.8.3

Description

The happens when browsing subversion directories in the repo - showing the root works as does going sraight to a file, viewing it, comparing, etc.

Crash log attached.

I'm stumped for ideas as to why this should be.
The server in question runs NetBSD-5.0 and all the required rails foo from pkgsrc HEAD.

Associated revisions

Revision 2722 - 2009-05-10 11:49 - Jean-Philippe Lang

Prevent nil error when retrieving svn version (#3268).

History

#1 - 2009-05-10 11:43 - Jean-Philippe Lang

- Status changed from New to Resolved

Apache is not the problem. This website runs with Apache and SVN browsing works just fine.
I don't know why but the svn --version command seems to fail. I've committed a fix in r2722 that should prevent this error from being raised.
Can you confim please?

#2 - 2009-05-11 12:24 - Roy Marples

Confirmed fix.
Thanks!

#3 - 2009-05-19 20:16 - Eric Davis

- Target version set to 0.8.5

- Resolution set to Fixed

Should be merged into 0.8.x stable branch.

#4 - 2009-09-13 13:50 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8-stable in r2883.
