Installed Redmine 4.1.0.stable from scratch following RedmineInstall guide.
Created a new project / tracker / issues. Have done the configuration.

Now having a Redmine issue with Gantt. Directly after installation, the Gantt Tab is showing the following.
"500 - An error occurred while executing the query and has been logged. Please report this error to your Redmine administrator."
Looking for a workaround to get the Gantt Tab working.

I have confirmed that the query edit form can set the same field more than once as sort criteria and the same column appears multiple times in the ORDER BY clause as a result.

I think the following checks (at least the first one) should be added.

- Don't add the same column to ORDER BY clause more than once
- Reject specifying the same field more than twice for sort criteria in the query edit form

Is there any workaround on this?

Exclude the same column from the ORDER BY clause.
I attached a patch.

Thank you, Yuichi HARADA.
It works on my Redmine. :)

You have skipped tests. Run with --verbose for details.
We should fix this in version:"4.1.1" together with #30285.

for reference #29581 caused the issue
patches 32737-remove-duplicate-keys.patch and gantt.rb.patch should be applied
```

That's great. All tests completed successfully by combining 32737-remove-duplicate-keys.patch and gantt.rb.patch. However, since the relative path of gantt.rb was unknown, I was rebuilt gantt.rb.patch.

  - Related to Defect #29581: Issues in paginated views may be lost because sorting criteria are not unique added

#19 - 2020-04-02 09:59 - Go MAEDA
  - Status changed from New to Closed
  - Assignee set to Go MAEDA
  - Resolution set to Fixed

Committed the patch. Thank you to everyone involved in testing and fixing the issue.
