Try to add a thumbs up character. The version installed at my company will give an error page. The version on this website will show nothing.

<https://emojipedia.org/thumbs-up-sign/>

I think is the same as [#21398](#). People posted some workarounds there.

#3 - 2021-12-03 08:55 - Marco Shima

Test if working on redmine.org: Comment that contains certain Unicode characters can't be saved. Here we are:

Solution: Convert table to utf8mb and set in file database.yml "encoding: utf8mb4"

#7 - 2022-02-14 20:51 - Florent H.

Hello, the solution may fix the issue but you could be more precise by giving the required command or sql query to run please.

I think the wiki and other contents should be fixed. So we could apply a conversion to table "issues" and all others ?

#8 - 2024-02-03 07:33 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

[#note-6](#) is the solution.
