Redmine - Defect #32770

Text formating on Redmine Home page does not work

2020-01-08 11:04 - Sebastian Paluch

Status:	Needs feedback		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Text formatting		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	4.1.0

Description

On Home page following text formatting is not working anymore (was working in 3.4.4)

```
something *%{color:red}something%* something...
```

It gets displayed as plain text.
This still works in other places e.g. project overview.

```
Environment:
  Redmine version              4.1.0.stable
  Ruby version                 2.5.7-p206 (2019-10-01) [x64-mingw32]
  Rails version                5.2.4.1
  Environment                  production
  Database adapter             Mysql2
  Mailer queue                 ActiveJob::QueueAdapters::AsyncAdapter
  Mailer delivery              smtp
SCM:
  Subversion                   1.11.1
  Git                          2.19.1
  Filesystem
Redmine plugins:
  no plugin installed
```

History

#1 - 2020-01-12 20:42 - Marius BĂLTEANU

- File home.png added

- Status changed from New to Needs feedback

- Assignee set to Sebastian Paluch

Where did you input that text?

In Home page, I tried 2 scenarios:
1. Set as "Welcome text" and it works.
2. Set as News summary and it doesn't work.

  home.png
It will be helpful to provide the steps to reproduce the problem.

#2 - 2020-01-13 09:20 - Sebastian Paluch

Sorry, I was not precise in this issue.

The exact text entered in "Welcome text" is:

```
Jump to "*%{color:red}Redmine help project%*":/redmine/projects/redmineusers/wiki and follow the guides...
```

This results with following text being displayed on the Home page:

```
Jump to *%{color:red}Redmine help project%* and follow the guides...
```

It seems that the link makes the difference.

#3 - 2020-01-13 22:28 - Marius BĂLTEANU

- File 3.4.12.png added

- File trunk.png added

- File new_text.png added

Indeed, in Redmine 3.4.12, the following text

```
Jump to "*%{color:red}Redmine help project%*":/redmine/projects/redmineusers/wiki and follow the guides...
```

is rendered as:
  3.4.12.png
where "Redmine help project" links to "redmine/projects/redmineusers/wiki".

In current trunk, the same text is rendered as:
  trunk.png

but if you change the text to

```
Jump to *"{color:red}Redmine help project":/redmine/projects/redmineusers/wiki* and follow the guides
```

or

```
Jump to *%"{color:red}Redmine help project%*":/redmine/projects/redmineusers/wiki and follow the guides...
```

then is rendered as expected:
  new_text.png

I'm not sure why the old format doesn't work anymore, but I've added Go Maeda as watcher, he knows better the Textile formatting.

#4 - 2020-04-11 11:52 - Marius BĂLTEANU

- Assignee changed from Sebastian Paluch to Go MAEDA

Go Maeda, do you have any clue about this issue?
