BTW - Its you guys have the same custom field as were using and looking to change "Resolution"

and ... that paste went a little all over the place attempt number 2:

<Kiall> Hi all - i'm looking to get redmine to update a custom field when a ticket is closed via a commit - i've found where this happens at the mo, eg "issue.status = fix_status", but how would set a custom field?

<Kiall> right so :) looking at the plugin guide now ... any additional tips on what events etc i should be hooking into?

<edavis10> Kiall: if you post on the Redmine.org forums, someone might be able to help you with the code for that.

<edavis10> Kiall: let's see... <edavis10> Kiall: only with an issue that is closed via a commit?

<Kiall> yeah thats the plan ..

<Kiall> just like the "fixes #1234" closing the click @ setting to 100%

<edavis10> Kiall: we'd need to add a plugin hook in there, I don't see one right now.

<edavis10> Kiall: open a new issue describing this with me as the Assigned to and I'll add it.

<edavis10> just pastie the conversation in

#2 - 2009-05-31 00:23 - Eric Davis

- *Status changed from New to Resolved*

- *Target version set to 0.8.5*

- *% Done changed from 0 to 100*

Added a new hook, :model_changeset_scan_commit_for_issue_ids_pre_issue_update. r2773

#3 - 2009-09-13 13:43 - Jean-Philippe Lang

- *Status changed from Resolved to Closed*

Merged in 0.8-stable in r2882.

#4 - 2009-09-13 15:22 - Kiall Mac Innes

:)

Thanks!
