

Redmine - Defect #3280

Upgrade to 0.8.3 did not upgrade ampersand in wiki page title correctly

2009-05-01 06:27 - Mark P

Status:	Closed	Start date:	2009-04-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	0.8.3
Resolution:	Wont fix		
Description <p>Used the Option 1 upgrade method from RedmineUpgrade to upgrade to 0.8.3 from 0.7.3 where we had a wiki page title that included an ampersand, ie "XY&Z Text". When the upgrade was complete, the referring wiki page truncated the page link for the ampersand page. If I pasted the wiki page URL as it was in the 0.7.3 version it came up in 0.8.3, so the migrate database did bring the page along in the migration.</p> <p>To fix it manually, I renamed the wiki page and removed the ampersand. I then changed the Wiki link text in the referring page to reflect the renamed Wiki. Agreed that it was not a big effort, but it could have been if I had lots of wiki pages with special characters.</p>

Can you please also spell ampersand correctly in this defect's subject line to correct my typo (forgot the 'a')? Thanks.

#2 - 2009-05-01 20:18 - Eric Davis

- Subject changed from Upgrade to 0.8.3 did not upgrade mpersand in wiki page title correctly to Upgrade to 0.8.3 did not upgrade ampersand in wiki page title correctly

#3 - 2013-05-11 03:07 - Jean-Baptiste Barth

- Status changed from New to Closed
- Resolution set to Wont fix

Old issue, people having this problem might have fixed it manually, I think it can be safely closed.
