Description

Add an option to include the version's issue count or filter by issue count in the Versions section of the API.

Useful if you are going through all the versions and displaying them in a page, so you don't have to do another request to check if the version has issues.

Include issue count :

```
GET /project/1/issues.<xml/json>?include=issue_count
```

```
<?xml version="1.0" encoding="UTF-8"?>
<versions type="array" total_count="34">
  <version>
    <id>1</id>
    <project name="Redmine" id="1"/>
    <name>0.7</name>
    <description/>
    <status>closed</status>
    <due_date>2008-04-28</due_date>
    <sharing>none</sharing>
    <created_on>2008-03-09T12:52:06+01:00</created_on>
    <updated_on>2009-11-15T12:22:12+01:00</updated_on>
    <wiki_page_title>FooBarWikiPage</version_wiki_page_title>
    <issue_count>13</issue_count>
  </version>
</versions>
```

Filter by issue count :

```
// Issue count in greater or equal to 0
GET /project/1/issues.<xml/json>?issue_count=%3E%3D0
```
