Description			
<p>I can't find any way to get the list/count of reopend issue. To reopen an issue i had to make changes in workflow to allow status change from closed.</p> <p>In my opinion there should be an direct option to reopen the closed issue and make its reports as well.</p> <p>This will give an option to closely monitor first time right solutions for an organization and its performance.</p>

Hi
I use REDMINE 1.1.2 with MySQL.Is there a simple way to re-open a closed issue in REDMINE. I accidently closed one of the issue and now trying to re-open and I don't see any option for that.

Regards
JJohn
