Target version:	4.2.0		

Description

```
$ bin/rails test test/functional/admin_controller_test.rb
```

```
.  
. .  
. .
```

```
DEPRECATION WARNING: render file: should be given the absolute path to a file (called from  
_app_views_layouts_admin_html_erb___682843397516142584_70111060943800 at  
/path/to/redmine/app/views/layouts/admin.html.erb:8)
```

The behavior has changed by this commit:

<https://github.com/rails/rails/commit/c7820d8124c854760a4d288334f185de2fb99446>

According to the commit log, the only difference between render file: and render template: before Rails 6 is that render file: can specify the absolute path of templates.

app/views/layouts/admin.html.erb does not use an absolute path to specify the template, so you can suppress deprecation warning by replacing render file: with render template:.

```
