Until we decide how the fix should look, I'm attaching a patch that moves the hardcoded width: 50% style from view files to application.css and changes some properties in responsive.css in order to drop the !important rule.

Setting the target version to 4.1.1.

- File 5\_columns.png added
- File 3\_columns.png added
- File 0001-Split-on-5-columns.patch added

We can revert the old behaviour by hiding the start date and due date or we can show all other columns on 5 columns layout instead of 3.

**Old layout with 3 columns and start date and due date hide:**

**5 columns layout:**

Regardless the option, I think we should show the Assignee column before Start date. For now, I'm attaching the patch with 5 columns layout.
