

Redmine - Defect #3289

E-mail in /user/edit/N displayed (and saves) as administrating users login-name

2009-05-04 16:23 - Kai Olav Fredriksen

Status:	Closed	Start date:	2009-05-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Administration	Estimated time:	0.00 hour
Target version:		Affected version:	0.8.3
Resolution:	Cant reproduce		
Description			
We have a 0.8.3 stable installation going. When I go in to administrate a user (/users/edit/<Number>) (I'm on my account - not Redmine Admin) - the e-mail field changes to my login-name.			

History

Not able to reproduce this problem.  
Do you have some details that would help to reproduce?

We're running "Redmine 0.8.3.stable (SQLite)" - I'm using it through Google Chrome on WinXP - I'm not sure what you need in order to reproduce, I will try it out a bit today, and try give a proper answer to you if I find anything that can help.

Ok - it's Google Chrome. OK when using IE. What happens is more than I reported. This is a very shallow observation: Administration->Users->Select user...: Fields labeled "Email" and "Password" turns yellow background. Email-field holds MY login-name, and "Password" holds dots (the "Confirmation"-field is normal, no dots - making it impossible to change user-details without setting password.)  
  
I used Chrome a good year ago when I installed Redmine on my previous job, without any problem - but it's not good to say what has changed, Chrome or Redmine.

Not "a good year ago" of course; "last year" that is

**#5 - 2016-01-20 07:03 - Go MAEDA**

- *Status changed from New to Closed*
- *Resolution set to Cant reproduce*

I am closing this issue. Please reopen if the problem persists on the current versions of Redmine.
