Rails 6 escapes filenames per RFC 2231 for all browsers <a href="https://github.com/rails/rails/commit/890485cfce4c361c03a41ec23b0ba187007818cc">https://github.com/rails/rails/commit/890485cfce4c361c03a41ec23b0ba187007818cc</a>			
#filename_for_content_disposition just returns the original name for compatibility reasons, but if we don't care, we can just remove the method
