Redmine - Defect #32981

Unable to distinguish disabled input fields

2020-02-11 02:22 - Hirokazu Onozato

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Go MAEDA	**% Done:**	0%
Category:	UI	**Estimated time:**	0.00 hour
Target version:	4.1.1		
Resolution:	Fixed	**Affected version:**	4.1.0

Description

Although it is a text box with disabled set, it is difficult to identify because the background color does not change.
(The cursor changes when you mouse over, so we can identify it.)

Below is the [Settings] > [Incoming emails] tab.
Disabled is set for [Incoming email WS API key], but it is difficult to identify that input is not possible because the background color does not change.

   disabled.png
This is because the following style is set in application.css.

```
input, select, textarea, button { color: #333; background-color: #fff; border:1px solid #ccc;
border-radius:3px; box-sizing: border-box;}
```

The background-color is #fff, but the background-color for disabled is not specified.

Suggested fix

There are two ways to fix this.

1. Add a style for disabled

The setting of "input:disabled, select:disabled, textarea:disabled" already exists, so add the background-color there.

```
input:disabled, select:disabled, textarea:disabled {
  cursor: not-allowed;
  color: graytext;
+  background-color: #ebebe4;
}
```

However, since there are various types of input, it is not clear whether there is no problem in specifying it uniformly like this.
It may be safer to specify only the required type, such as input[type="text"].

```
input[type="text"]:disabled,
input[type="password"]:disabled,
input[type="date"]:disabled,
input[type="number"]:disabled,
select:disabled,
textarea:disabled {
  background-color: #ebebe4;
}
```

2. Remove "background-color: #fff"

I think the need to reset the background-color is low.

```
- input, select, textarea, button { color: #333; background-color: #fff; border:1px solid #ccc; bo
rder-radius:3px; box-sizing: border-box;}
+ input, select, textarea, button { color: #333; border:1px solid #ccc; border-radius:3px; box-siz
ing: border-box;}
```

By not resetting, disabled will also be displayed in the default style.

- Related to Patch #31147: Add custom styles for all fields added

#2 - 2020-02-12 06:02 - Bernhard Rohloff

- Status changed from New to Confirmed

We styled the input fields background in [#31147](#) to get a consistent look of Redmine and fix problems with dark themed desktops.
I think your first solution is the most appropriate one.

#3 - 2020-02-13 08:52 - Go MAEDA

Onozato-san, thank you for reporting this issue.

Just out of curiosity, how did you pick the color #ebebe4?

#4 - 2020-02-13 16:29 - Hirokazu Onozato

- File chrome-css.png added

> Just out of curiosity, how did you pick the color #ebebe4?

Using Chrome's DevTools, I checked with Chrome default CSS.
On my Windows PC, it was rgb(235, 235, 228) = #ebebe4.

#5 - 2020-02-15 06:35 - Go MAEDA

- Target version set to 4.1.1

The first patch provided by Hirokazu Onozato looks good. Setting the target version to 4.1.1.
