Redmine - Defect #33

Preview fail for first wiki page of a project

2007-04-03 15:53 - Thomas Lecavelier

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**

Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	

Description

Always reproductible.

Conditions: edit the first page of wiki of a project BEFORE created it.

When you try to create the very first wiki page of a project, clicking on the "preview" link will fail with
a 404 error page display instead of the expected view. (message displayed is: "404 The page you were trying to
access doesn't exist or has been removed.")

In the log I get:

Filter chain halted as [#<ActionController::Filters::ClassMethods::SymbolFilter:0xb72517e8 @filter=:find_wiki>]
returned false.
Completed in 0.10124 (9 reqs/sec) | Rendering: 0.07554 (74%) | DB: 0.01723 (17%) | 404 Not Found

History

#1 - 2007-04-03 18:25 - Jean-Philippe Lang

Fixed.

Thanks

#2 - 2007-09-14 05:32 - Peter Kordel

Still doesn't work for me. Using r724

#3 - 2007-09-14 07:37 - Jean-Philippe Lang

Fix committed in r726.
