

Redmine - Defect #33023

Warning occurs when displaying a few exceptional PDF thumbnail

2020-02-19 08:19 - Anonymous

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Attachments	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.0
Resolution:			

Description

A PDF thumbnail is displayed, but the following message is output to STDERR.
The PDF file cannot be published, but it was created with a fax image (binary image).

```
convert.exe: profile 'icc': 'RGB ': RGB color space not permitted on grayscale PNG `redmine_root/tmp/thumbnails/***.thumb' @ warning/png.c/MagickPNGWarningHandler/1668.
```

The warning disappeared after applying the following patch.

```
--- a\lib\redmine\thumbnail.rb
+++ b\lib\redmine\thumbnail.rb
@@ -48,7 +48,7 @@
     size_option = "#{size}x#{size}>"

     if is_pdf
-      cmd = "#{shell_quote CONVERT_BIN} #{shell_quote "#{source}[0]"} -thumbnail #{shell_quote size_option} #{shell_quote "png:#{target}"}"
+      cmd = "#{shell_quote CONVERT_BIN} #{shell_quote "#{source}[0]"} -thumbnail #{shell_quote size_option} +profile icc #{shell_quote "png:#{target}"}"
     else
       cmd = "#{shell_quote CONVERT_BIN} #{shell_quote source} -auto-orient -thumbnail #{shell_quote size_option} #{shell_quote target}"
     end
```

Environment:

Redmine 4.1.0

ImageMagick 6.9.10-Q16

History

#1 - 2020-02-19 08:28 - Go MAEDA

Thank you for reporting the issue. Could you provide a sample PDF file that causes the error?

#2 - 2020-02-20 01:43 - Anonymous

- File samplePDF.pdf added

Here is a sample PDF.

#3 - 2020-02-21 01:48 - Go MAEDA

Thank you for providing the PDF file but I could not reproduce the issue. A thumbnail was generated without any error.

```
$ convert ~/Downloads/samplePDF.pdf[0] -thumbnail "200x200>" png:test.png
```

```
$ convert -version
```

#4 - 2020-02-21 04:00 - Anonymous

I tried ImageMagick 7.0.9-24 Q16, but still got the error.
No error occurs when adding the "+profile icc", "-strip" or "-quiet" parameter.

Adding info:
Ghostscript v9.21 or earlier got no errors, however v9.22 or later got errors.

#5 - 2020-06-12 06:17 - Anonymous

The same error occurs even with the latest Ghostscript ver9.52.

#6 - 2020-06-13 16:50 - Go MAEDA

The warning successfully reproduced with ImageMagick 7.0.10-14 and GhostScript 9.52. But is it OK to always remove ICC profile?

I don't know the side effects of adding the option "+profile icc".
I suggest adding the "-quiet" option instead of "+profile icc".
The "-quiet" option has the same effect.
