Description	
<p>It would be nice for a user to be able to set a "Dark Mode" for the Redmine UI.</p> <p>This would allow people who prefer working with darker colours or have light-sensitivity issues to be able to use Redmine without any issues.</p> <p>Many apps and mobile devices offer Dark Mode as a standard per-user setting.</p>

Many apps and mobile devices offer Dark Mode as a standard per-user setting.

Would love to have this feature on my website
