<b>Description</b>			
Hi all,			
I have re-installed a new redmine instance (3.4.4.stable) but I have an issue when displaying diff. Notice that viewing file works correctly.			
For example see :			
<a href="https://dev.linea21.com/projects/linea21/repository/revisions/3514/diff">https://dev.linea21.com/projects/linea21/repository/revisions/3514/diff</a>			
Or click and "diff" link from <a href="https://dev.linea21.com/projects/linea21/repository/revisions/3514">https://dev.linea21.com/projects/linea21/repository/revisions/3514</a>			
Log displays the following error :			
<pre>Started GET "/projects/linea21/repository/revisions/3514/diff" for 78.194.240.218 at 2020-02-28 18:25:47 +0100 Processing by RepositoriesController#diff as HTML   Parameters: {"id"=&gt;"linea21", "rev"=&gt;"3514"}   Current user: simon (id=3) Read fragment views/repositories/diff/2/8af392258e467ca4d2689471a84f0aa7 (0.4ms)   Rendered common/error.html.erb within layouts/base (0.4ms) Completed 404 Not Found in 63ms (Views: 23.5ms   ActiveRecord: 9.3ms)</pre>			
Don't understand why. Any help would be nice.			
Thanks
