Add a link to the issues list in reminder email

With the attached small patch, you will be able to see the same issues list as a reminder email by clicking the issue count in the reminder.

In my observation, some people see a reminder email several times a day in order to decide what they should do next. I think the patch helps such people.

The number of issues will be a link:
remark-with-link@2x.png

You can see the same list on Redmine by clicking the link:

Thank you for the feedback. Setting the target version to 4.2.0.
Committed the patch.
