Currently, the priority issues filter supports only "is" and "is not" operator.

I think the filter will be more useful if it has "<=" (less than), ">=" (larger than), and "between" operators like numeric fields. Use cases:

- "Priority", ">=" , "Normal" : Lists issues whose priority is normal or higher. It filters out issues with lower priority
- "Priority", "between", "High", "Immediate": Lists issues that has higher priority value
