"<=", ">=", and "between" operator for priority filter

Currently, the priority issues filter supports only "is" and "is not" operator.

I think the filter will be more useful if it has "<=" (less than), ">=" (larger than), and "between" operators like numeric fields.

Use cases:
- "Priority", ">=" "Normal" : Lists issues whose priority is normal or higher. It filters out issues with lower priority.
- "Priority", "between", "High", "Immediate": Lists issues that has higher priority value.
