Default version and assignee are not exposed via projects API

Redmine - Defect #33113

Status: Confirmed
Priority: Normal
Assignee:
Category: REST API
Target version: 4.0.7

Description

I would like either a field on project or a field the specific version but now there is no way of knowing which version id set as default on a project

Related issues:
- Related to Redmine - Feature #1828: Default target version for new issues
- Related to Redmine - Feature #482: Default assignee on each project

History

#1 - 2020-03-09 13:47 - Go MAEDA

- Subject changed from Default Version is not exposed via the API to Default version and assignee are not exposed via projects API
- Status changed from New to Confirmed

I think the default assignee should be in the API response as well.

#2 - 2020-03-09 13:51 - Go MAEDA

- Related to Feature #1828: Default target version for new issues added

#3 - 2020-03-09 13:52 - Go MAEDA

- Related to Feature #482: Default assignee on each project added

#4 - 2020-03-10 22:24 - Marius BALTEANU

The following JSON response is enough (keys default_version and default_assignee)?

```json
{
  "project": {
    "id": 1,
    "name": "eCookbook",
    "identifier": "ecookbook",
    "description": "Recipes management application",
    "homepage": "http://ecookbook.somenet.foo/",
    "status": 1,
    "is_public": true,
    "inherit_members": false,
    "default_version": {
      "id": 3,
      "name": "2.0"
    },
    "default_assignee": {
```
That would be perfect for my use case.

Here is the patch, I think we can deliver this fix in a minor release. If not, please move it to version: "4.2.0".

Test results [here](#).

I agree. The two attributes should have been added in Redmine 3.2 or 3.4. And adding attributes does not break existing API clients if those are properly implemented.
