| <b>Description</b><br>introduced with the issue <a href="#">#19097</a> , the user was not allowed to zoom. this is a major offender opposing to a userfriendly mobile experience. there are a numbers of reasons to zoom on mobile ranging from bad sight all the way to read text on a screenshot attached to an image, which i did not want to download.<br><br>there is next to no valid reasoning to disallow the enduser to zoom on mobile devices, so please revert this change!<br>there was no reasoning behind this limitation in the issue either. The changelog stated only, that its not desireable to zoom, which does not mean it should be forbidden!<br><br>Patch included. |                 |                        |           |

I agree that there is no reason to disallow zooming. W3C's [HTML 5.2 specification](#) says that "authors should not suppress or limit the ability of users to resize a document, as this causes accessibility and usability issues."

Setting the target version to 4.1.1.
