

Redmine - Defect #33168

error on ubuntu update

2020-03-18 09:14 - simo geo

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>Hi,</p> <p>running update on ubuntu 18.04 server, I get an issue related to redmine.</p> <p>It seems redmine does not search Gemfile in the right folder.</p> <p>See the error : `chown: cannot access '/var/lib/redmine/Gemfile.lock': No such file or directory`.</p> <p>The point is my Gemfile.lock is located in `/usr/share/redmine` folder.</p> <p>I guess, this is related to redmine.postinst script as pointed out in following thread : https://bugs.launchpad.net/ubuntu/+source/redmine/+bug/1621845</p> <p>I'm supposed to be able to fix it by commenting instructions, but it could be nice to fix the issue natively.</p> <p>See also : https://stackoverflow.com/questions/45757459/redmine-3-2-1-2-ob-ubuntu-16-04-breaks-on-apt-upgrade</p> <p>Here is the full console output :</p> <pre>Setting up redmine (3.4.4-1ubuntu0.1) ... /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:10: warning: constant Gem::ConfigMap is deprecated /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:10: warning: constant Gem::ConfigMap is deprecated /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:29: warning: constant Gem::ConfigMap is deprecated /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:30: warning: constant Gem::ConfigMap is deprecated /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:10: warning: constant Gem::ConfigMap is deprecated /usr/lib/ruby/vendor_ruby/rubygems/defaults/operating_system.rb:10: warning: constant Gem::ConfigMap is deprecated NOTE: Gem::Specification#rubyforge_project= is deprecated with no replacement. Thanks for your support

History

#1 - 2020-03-18 10:51 - Go MAEDA

I think the issue is due to the redmine package provided by the Ubuntu team.

Could you report the issue to the Ubuntu team? I think the issue has nothing to do with Redmine core.
