**Description**

Steps to reproduce:

1. Add a text format UserCustomField
2. Enable "Text formatting" for the custom field
3. Try to edit any user. You will see the Internal Server Error page

Completed 500 Internal Server Error in 145ms (ActiveRecord: 4.4ms)

**Related issues:**

Related to Redmine - Feature # 31989: Inline issue auto complete (#) in field...  Closed
Unable to edit user or group that has custom fields with text formatting enabled (#33183).

Patch by Go MAEDA and Marius BALTEANU.

Merged r19613 from trunk to 4.1-stable (#33183).

This is due to r18444.

- Related to Feature #31989: Inline issue auto complete (#) in fields with text-formatting enabled added

- Assignee set to Marius BALTEANU

The following code fixes the issue.

```ruby
+ module CustomFieldsHelper
+   data = {
+     :auto_complete => true,
+     :issues_url => auto_complete_issues_path(:project_id => custom_value.customized.project, :q => '')
+   }
+   if custom_value.customized && custom_value.customized.project
+     self,
+   end
+   custom_value.custom_field.format.edit_tag( self,
+   #) if custom_value.customized && custom_value.customized.project
+ + + 

- File test_for_33183.patch added
- Assignee changed from Marius BALTEANU to Go MAEDA
- Target version set to 4.1.1

The fix looks good to me and I have attached a test case.

Thanks Go Maeda for detecting this issue.
#6 - 2020-03-24 14:00 - Go MAEDA

- Subject changed from Cannot edit user if it has UserCustomField with text_formatting enabled to Unable to edit user or group that has custom fields with text formatting enabled
- Status changed from New to Closed
- Resolution set to Fixed

Committed the patch.
