

## Redmine - Defect #33195

### 500 error when having only one SCM enabled

2020-03-24 21:05 - Txinto Vaz

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	SCM	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	4.1.0
<b>Resolution:</b>	Invalid		
<b>Description</b>			
Look at this code			
<pre>def build_new_repository_from_params   print params   print ("\n-----\n")   print params[:repository_scm]   print ("\n-----2-----\n")   print Redmine::Scm::Base.all   print ("\n-----3-----\n")   print Setting.enabled_scm   print ("\n-----4-----\n")   print (Redmine::Scm::Base.all &amp; Setting.enabled_scm)   print ("\n-----5-----\n")   print (Redmine::Scm::Base.all &amp; Setting.enabled_scm).first   print ("\n-----6-----\n")   scm = params[:repository_scm]    (Redmine::Scm::Base.all &amp; Setting.enabled_scm).first   unless @repository = Repository.factory(scm)     render_404     return   end    @repository.project = @project   @repository.safe_attributes = params[:repository]   @repository end</pre>			
And look at these two traces:			
<ul style="list-style-type: none"><li>• The first one when you only have Git enabled as SCM (fails)</li><li>• The second one when you have Git and Bazaar enabled (works)</li></ul>

```

Possible root cause: when you have only one SCM enabled, the result of the & operation is a String, not an array. This is causing it to fail.

A workaround is to enable another SCM.

Regards.

## History

## #1 - 2020-03-25 03:51 - Go MAEDA

I was unable to reproduce the error. If you use plugins, could you try again after removing all plugins?

```
{"controller"=>"repositories", "action"=>"new", "project_id"=>"ecookbook"}
-----2-----
["Subversion", "Mercurial", "Cvs", "Bazaar", "Git", "Filesystem"]
-----3-----
["Git"]
-----4-----
["Git"]
-----5-----
Git
-----6-----
```

## #2 - 2020-03-26 00:06 - Txinto Vaz

You are right.

If I uncheck Git and check it again, the trace is this:

```

tiveRecord: 12.3ms)
```

The reason was a plugin I was developing which tried to preconfigure Redmine for an automatic installation based in docker.

In my code I have this:

```
s = Setting.find_by_name("enabled_scm")
if (s == nil) then
  s = Setting.new
  s.name="enabled_scm"
end
s.value = "Git"
s.save
```

and I think I have to change it to this:

```
s = Setting.find_by_name("enabled_scm")
if (s == nil) then
  s = Setting.new
```

```
s.name="enabled_scm"  
end  
s.value = ["Git"]  
s.save
```

Thank you for your support, sorry for the noise.  
Regards.

**#3 - 2020-03-26 00:07 - Txinto Vaz**

- *Status changed from New to Resolved*

**#4 - 2020-03-26 06:44 - Go MAEDA**

- *Status changed from Resolved to Closed*

- *Resolution set to Invalid*

Thank you for the feedback and I am happy to know that the issue on your instance is resolved.
