Target version:	4.2.0		
Description			
<p>The description in doc/INSTALL for cases where ImageMagick is not installed can be removed.</p> <p>In Redmine 4.1, RMagick is replaced by MiniMagick, so you no longer get error with `bundle install` even if ImageMagick is not installed. The reason why no error occurs is that MiniMaigck does not require ImageMagick's development library during installation.</p> <pre>diff --git a/doc/INSTALL b/doc/INSTALL index d363c8a2a..f4374dae1 100644 --- a/doc/INSTALL +++ b/doc/INSTALL @@ -33,10 +33,6 @@ Optional: 4. Install the required gems by running: bundle install --without development test - If ImageMagick is not installed on your system, you should skip the - installation of the rmagick gem using: - bundle install --without development test rmagick - Only the gems that are needed by the adapters you've specified in your database configuration file are actually installed (eg. if your config/database.yml uses the 'mysql2' adapter, then only the mysql2 gem</pre>
