Redmine - Patch #33208

`--without rmagick` option for bundle command is no longer necessary

2020-03-29 11:15 - Go MAEDA

Status:	Closed		**Start date:**

Target version:	4.2.0			

Description

The description in doc/INSTALL for cases where ImageMagick is not installed can be removed.

In Redmine 4.1, RMagick is replaced by MiniMagick, so you no longer get error with `bundle install` even if ImageMagick is not installed. The reason why no error occurs is that MiniMaigck does not require ImageMagick's development library during installation.
