

Redmine - Feature #3324

Default version of a project

2009-05-08 16:46 - Zarooba Rozruba

Status:	Closed	Start date:	2009-05-08
Priority:	Normal	Due date:

Target version:			
Resolution:	Duplicate		
Description Our shop has multiple web apps, meaning that users do not know what version the app is in production (ie: phase 1 vs phase 2). It would be nice to assign a specific default version per project, so that users do not have pick one (Especially since users could pick and file a bug against wrong version). This way anyone (QA especially) can put tickets against upcoming versions, while by default tickets are automatically assigned a previously designated version.
