- Subject changed from Multiple issue ids in "Subject" filter to Multiple search terms in "Subject" filter

- Category set to Filters

- Resolution set to Duplicate

What the original post request is a feature to perform AND search with multiple keywords in the Subject filter. The feature, to perform AND search with multiple keywords in text filters, was implemented in Redmine 5.0 ([#35764](#35764)).

The following is a translation of the Japanese part.

AND

"Please add the ability to perform AND search with multiple keywords in the 'contains' and 'not contains' operators in the 'Subject' filter."

#2 - 2023-05-05 09:29 - Go MAEDA

- Is duplicate of Feature #35764: Multiple search terms in the "contains" operator of text filters added

#3 - 2023-05-08 15:31 - Go MAEDA

- Status changed from New to Closed
