Redmine - Defect #33303

CustomField float 2.000,55 instead of 2,000.55

Target version:				
Resolution:	Duplicate		**Affected version:**	4.1.0

Description
Hello,
I have created a custom field. Selected as a floating point number.
If I enter a number in the field then I get an error message that the number is not accepted. I want to enter the number in this format **2.000,55**. But that only accepts this format **2,000.55**.
I use the local de.yml and it should work. I have found a ticket on this topic that might fit but it was created 10 years ago.
Thanks in advance

- Status changed from Reopened to Closed

Please don't make me say the same thing. It should be discussed on the existing issue. What you should do is pointing the existing issue you found.
