Target version:	4.2.0		
Description			
<p>Sometimes, the IssuesSystemTest#test_bulk_watch_issues_via_context_menu test fails for click_link loosing the focus on the context menu entry.</p> <p>According to my googling, this seems to be a known sporadic Capybara issue. Solution seems to use find().hover.click instead of click_link. The hover seems to help ensure that click is not applied out of element boundaries whatever the javascript asynchronous execution.</p> <p>Refer to this comment: http://aokolish.me/blog/2012/01/22/testing-hover-events-with-capybara/#comment-2118167329</p> <p>Adding sleeps either before or after click_link has no effect instead.</p> <p>How to reproduce: the following fails sporadically</p> <pre>RAILS_ENV=test bundle exec rails test:system TESTOPTS="-n '/^(?:IssuesSystemTest#(?:test_bulk_watch_issues_via_context_menu))\$/'</pre> <p>Attached my proposed path. Thanks</p>
