Possible double includes in issue query in gantt helper

The following include line source:/tags/3.4.0/lib/redmine/helpers/gantt.rb#L141 should not be needed anymore as per r16221. It will not cause any problems currently, but should for example the sort options include any of the included relations, this might lead to ambiguous names in the JOIN statement/double JOIN statements leading to an error in the sorting.

This affects all versions since 3.4.0

Contributed by Felix Schäfer.

Setting the target version to 5.0.0.

Committed the fix. Thank you.
